Subject Matter/ Topic: \_\_\_\_\_  
Activity Title: Activity 6: Enjoying the computer by E.S Pineli  
Learning Target: \_\_\_\_\_  
Reference: \_\_\_\_\_  
Values: \_\_\_\_\_

**AT FIRST I WAS THINKING...**

- At first, I was reminded of the 2010 film RPG metanoia. It was the epitome of how cyber life sprouted like mushrooms. The film depicts how devoted today's children are to computers, almost to the point of doing nothing but staring at screens. The mother in the film tells her son to go outside and let the sun hit his skin because they didn't have the technology we do now. However, computers are now everywhere, and this trend will continue.

**NOW I AM THINKING...**

- Now I believe it is never too late to learn something new. There's an old adage that goes, "Better late than never." Another thought that occurs to me is that we should never be afraid of change. Change, like the rest of the world, is unavoidable. Whether we like it or not, we will always be moving forward. Instead of being afraid of change, we should welcome it with open arms. The old ways still exist, and don't forget that you can use them as a guide. A guide for how you will live your life, but we must accept that we are now living in the computer age.

**AFTER READING I THINK...**

- After reading, I realized that there are people who are eager to learn, and we must teach them how to live in our era. Today's society is heavily reliant on technology. It has both positive and negative effects on the world and has an impact on people's daily lives. You can either be the person who is removed from reality or the person who uses technology to make your life easier.
